

Religious Education

In R.E. we will look at different places of worship and consider why they are different. They will think about places of worship they have visited and why they are important.

Science

The children will be learning about plants. They will grow cress and broad beans so they can learn about the germination process.

Computing

Children will learn to use a paint programme to create an Island.

Through the unit they will develop their mouse skills and their skills in turning on and off a computer.

French

The children will learn different greetings and how to introduce ourselves. Through the unit, children will also learn through song.

Numeracy

The units taught this half-term are:

Measurement, weight and volume and place-value with numbers to 50. The children will learn through led activities and through provision.

Kingfishers

Spring Two

Topic

We will look at the topic 'An Island Home.' We will explore the similarities and differences between their own locality and the Island of Coll (the fictionalised Isle of Struay in the Katie Morag stories).

Music

The children will be looking at Scottish music and singing some folk tunes.

P.E.

This term the children will be moving to music and practising different balances.

Literacy

The literacy will look at humorous poems and create our own. We will also be writing letters and postcards and sharing them with the class, developing our speaking and listening skills.
